Experience

Fucient Consulting

Pune, India

Pega Developer

02/2025 - 01/2026

Fucient Consulting is a technology consulting firm specializing in digital transformation using low-code/no-code platforms.

- Worked on end-to-end Pega application development, including requirement analysis, design, development, testing, and deployment.
- Designed and optimized case life cycles, workflows, and business rules to improve process efficiency and scalability.
- Implemented REST API integrations to enable seamless communication between Pega and external systems.
- Automated complex business processes using Pega low-code features, reducing manual intervention and turnaround time.
- Collaborated closely with cross-functional teams (Business Analysts, QA, and stakeholders) to deliver high-quality, scalable solutions in Agile sprints.
- Improved overall application performance through effective rule design and data page optimization.
- Reduced manual effort and processing time by automating key business workflows.
- Successfully delivered multiple Pega enhancements within sprint timelines while adhering to Pega guardrails and best practices.

Projects

Ansar Group Product Page Development

<https://mallicksharique.github.io/Ansar-Group-Product-Page/>

12/2023

This is a Qatar-based company. They gave me a design using Figma and my task was to make the same as the design.

- **Tech-Used:** HTML , CSS , JavaScript ,jQuery

OPEN-INVOICE-UI

<https://bitbucket.org/open-invoice/open-invoiceui/src/master/>
